PROFILE

I'm a Computer Science student at the University of Lethbridge looking for new grad opportunities!

EMPLOYMENT HISTORY

Sep 2023 — Present

Web Accessibility Specialist, ApexCalculus/ University of Lethbridge

Lethbridge, AB

Working under Dr. Sean Fitzpatrick to provide accessibility features for the APEX Calculus textbook. WIP.

May 2023 — Aug 2023

Software Dev Engineer Intern, Amazon

Victoria, BC

- Developed cross-domain tracking widget, enabling order monitoring on AbeBooks.com. Ensured accessibility with web-accessible features from project inception.
- Assumed Full-stack responsibilities with a focus on React and VM templates for front-end development.
- Managed and updated servlets using Java and Apache Tomcat for seamless integration and enhanced functionality on the server side.
- Utilized AWS CDK to define cloud infrastructure as code, streamlining the provisioning and management of AWS resources.
- Used Jenkins for CI/CD pipeline and leveraged Git for version control.
- Resolved varied customer-facing tickets, enhancing user experience through agile methodologies.

Sep 2022 — Dec 2022

Automation Tools Developer Co-op, Fortra

Ottawa, ON

- Worked closely with software developers and test engineers to develop and maintain automation code using Java, JUnit, and Selenium.
- Tested, executed, and oversaw execution of automation code on multiple operating systems, in physical, virtual, and cloud environments.
- Leveraged coding, networking, and general systems knowledge to triage and resolve software and environmental failures.
- Participated in the full development life cycle and Agile (Kanban) process.
- Followed established coding standards and attended multiple design and code reviews.
- Submitted and resolved defects and stories.
- Ramped up on additional software, technology, languages, and tools, as required.

EDUCATION

Jan 2023 — May 2024
